

# International Week – Santarém-Portugal

## Freedom and Citizenship in Europe

### 18th – 22nd April 2022

# Freedom and Citizenship in Europe

- We are living a specific period of global, national and local changes that brings us new challenges.
- Our lives are more and more under the influence of global financial markets, the speculation in major world stock exchanges, the interests of multinationals and also the surveillance of social networks.
- The extremism create a world of fear and hidden so many interests.
- The media (TV, radio, newspapers, magazines, etc) are increasingly integrated in major economic groups.
- Is necessary to develop, either individually or collectively, a more critical attitude.
- Our freedom is increasingly dependent on our attitude as critical, independent and active citizens
