

we are teacher trainers!

- Infant Education
- Primary Education
- Pedagogy
- Social Education

Welcome to Escuni

It is our mission to train different professionals in the world of teaching, to make them capable of taking on an active role in a type of education that transforms and is inspired by fundamental values for citizenship.

We advocate a pedagogy in which we bring together global teacher training and innovation in education.

We are proud to have over fifty years of experience in the field of Teacher Education.

What is our hallmark?

A Project to train professionals in the fields of Teacher Training, Pedagogy and Social Education, inspired by Christian values.

A **quality scientific training** to prepare would-be teachers, pedagogues and social educators to carry out their professions.

A **pedagogical training** based on personal development, respect for the others, self-confidence and empathy.

A working environment that enables critical thinking and reflection in order to give students the tools to overcome difficulties in their personal and professional lives.

Our own methodology

Based on tutorised independent work and self-regulated learning. New and innovative spaces designed for teaching. PBL (project-based learning) and cooperative work.

Teaching Practice

Quality training in bilingual schools from our Community. Hands-on experience to complement subjects taught and learned in the classroom.

Reduced groups and personalised attention

Students are in charge of their own learning process, they become the main protagonists. Guidance and tutoring are provided in either small groups or by means of individual follow-up.

An experience of a life-time!

A unique opportunity to know a different education system, and have a closer look at different and innovative ways to teach children in Pre-Primary and Primary settings.

And all in beautiful cosmopolitan Madrid! Make sure you don't miss it!

| What can we offer?

A full programme taught in English worth 24 ECTS credits with School Practice included. Subjects that integrate the knowledge and skills that are necessary to train student teachers to professionally face the reality of classrooms.

| Oral competences and its didactics

This subject will provide you with a comprehensive understanding of varied teaching methods, techniques and strategies used in the world of TEFL (Teaching of English as a Foreign Language).

It is based on a practical approach to allow you to use speaking and listening skills confidently and effectively, and also to use critical thinking in every step taken in the teaching - learning process.

| Didactic resources for primary education in EFL settings

Driven by EFL practice design, you will have the chance to use and evaluate not only digital but also more traditional or conventional classroom resources in order to assess your own performance as a teacher, as well as that of your peers.

You will have ample opportunity to see what works or what does not work in a Primary classroom, to explore how teaching can be done in many different ways to make it meaningful.

| EFL reading and writing and its didactics

This will get you closer to using the two skills that are not traditionally a main focus in Primary: reading and writing.

The idea of how to improve and encourage literacy in a foreign language through fun and engaging activities, will open up new doors for you to think and realise that those two skills, make in fact a much better pair!
